Local and General

Happenings Here, There and Everywhere, Past Present and Future

Mr T. R. Cliphsham and family of Kimmundly, moved into town this week. They will live in the house recently occupied by Mr. Roberts.

Mr. and Mrs. McFadden of Big Spring intend leaving this week for the States.

M. John Oszust of Oyen, was in town last week.

Mr. M. E. Bird left on Saturday for Vancouver.

Elmer Lensegraf left this week for Devonport, Iowa.

Ladies Card Club

The Ladies Card Club held at the home of Mrs. Woodruff on Monday evening, Nov. 8th found Mrs. Yake and Mrs. Meade a tie their score being 141 points. The Club will meet to-night at the home of Mrs. Hinds.

Miss Anna Ternes, who has been a visitor at the Hinds' home for the past week, left on Tuesday morning for her home in Saskatoon.

The Annual Winter Fair will be held in Calgary from Nov. 22 to 26.

On Sunday evening last in the Chinook Union church, the Rev. J. P. Suttle, of Cereal, preached an eloquent and inspiring sermon taking as his text, "What think ye of Christ."

Mr. H. C. Brigginsshaw spent the week-end at his farm near Provost.

The Chinook Agricultural Society will hold an Institute meeting on Thursday, Nov. 25, in the Schoolroom. A. E. Meyer, Superintendent of Agricultural Schools and Farms, and Mr. McBeath, of Youngstown Agricultural School and other speakers will address the meeting. A musical program will be given. After the meeting a dance will be held. Music by the Jazz Four.

HOME IN TIME FOR CHRISTMAS

Taking into consideration the time required in going from Western Canada to the Old Country and the desire of providing patrons with the maximum of comfort en route, the Canadian National Railways will on December 8th, 1920, operate from Winnipeg through to Halifax a special train to the ship's side of the S.S. "Magenta," which sails from Liverpool at 10.00 a.m., December 12th. This "Family Special" will have tourist and standard sleepers, diner and colonist cars.

The Canadian National Railways are most anxious to reduce all the discomforts of a long journey to the comforts that are found and appreciated in one's own home, and the hope is that this innovation will be so patronized by those returning to the "Old Sod" for Christmas as will decide the Canadian National Railways making this an annual event.

Make your reservations early. Full particulars may be had on application to any agent of the company or by writing to Mr. J. Madill, District Passenger Agent, Edmonton, Alberta.

Grand Banquet And Dance Given By G.W.V.A

The celebration of Armistice Day, Nov. 11, in Chinook, was in the form of a grand banquet and dance given by the local members of the Great War Veterans Association, and was probably the "most successful function which has ever taken place in Chinook."

Mr. C. W. Kideout, president of the local branch of the G. W. V. A., presided at the banquet in the Acadia Hotel dining room, which was tastefully decorated for the occasion. After the usual introductory remarks by the chairman, the guests, which numbered about forty, sat down to a very elaborate banquet which was much enjoyed. The toast to "Our King" was responded to by the whole assembly. The toast to "Our Fallen Comrades," and "Canada," were ably responded to by the Rev. G. Elliott. The toast to "Our Guests" was responded to by Mr. R. S. Woodruff.

The reception committee for the banquet were: Mr. C. W. Kideout and the Secretary of the G.W.V.A., Mr. J. E. McLeod.

The catering for the banquet was excellently served by Mr. J. L. Carter, proprietor of the Acadia Hotel.

After the banquet the guests adjourned to the Arm's Hall, where every thing was in order for the dance. During the evening about sixty couples took part in the dancing which went merrily on till the small hours of the morning when the tired but happy company dispersed to their respective homes.

Mr. Robt McClean and Mr. W. R. Key were on the dance committee which position they filled in a very satisfactory manner.

The music was provided for by the Jazz Four and was excellent.

CHINOOK COURT

On Wednesday, Nov. 10, Mr. Klaas Hohlen, Jr., was summoned before Magistrate Hewitt, and fined four dollars and costs, for irregular attendance of his children at school. The defendant pleaded guilty and promised the Magistrate that he would give the matter better attention in the future.

Mr. E. T. Mitchell, school inspector, prosecuted on behalf of the Department of Education.

Services will be held next Sunday at Laughlin at 11 a.m.; Mr. W. A. Todd's home at 3.30, and in Chinook at 7.30. Rev. Geo. Elliott will conduct the services.

Prices Smashed!

As we need money right away we are giving you tremendous values on the following goods:

O. HINDS, Prop'r

From the Diary of A Hudson's Bay Clerk in the Seventies

By O-GE-MAS-ES (Little Clerk).

(Copyrighted)

(Continued From Last Issue)
Making an early start next morning and taking along Pat's traps, we again made for the creek. We left our canoe at the mouth and struck up stream. An hour's steady tramping brought us to a heavy dam only roughly constructed; a little further up another dam slightly better made, and above these a splendid dam backing up quite a lake of water. Evidently the two first dams were only intended to relieve the pressure of high water on the principal one. At the far end of the lake were three large beaver lodges, with hard beaten trails on all sides and trees fallen in every direction, many of these being cut in short lengths. There were piles of chips and every evidence of busy industry. Patrick's face was a sight, as he estimated the water from forty to fifty or even more beavers resident, and as he had a big d.b.t. with the H. B. Company, here was the means to pay it and the shortest of food for the wife and little ones.

Walking round the lake very quietly, we select two good stands for watching that evening, as beaver seldom come out before dusk. Then, after a hasty lunch we went further up the stream setting traps in the most likely places. Returning to the beaver village about sundown we very noisily took our places, and then followed a long wait. We were both armed alike, double barrel guns of the usual H. B. style, 28 bore muzzle loaders with percussion locks, the barrels being extra heavy, making them suitable for either bolt or shot, and loaded at the present time with 3-1/2 drachms of powder, 1-2 oz. of shot, a tight fitting wad and a round bullet on top of all. This combination was a very deadly one at close quarters. At last I noticed the water leave close in front of my stand, and some ripples followed, again, and once again. Then up burst the head of a large beaver, which I immediately shot behind the ear and it at once sank in some twelve feet of water. Stripping off my clothes and standing like Don Cupid on the bank, I was about to dive after my game, when Patrick appeared, smiling to see my unusual costume. On describing the facts, he told me to dress, and cutting a long dry pole, served a gun-worm on the end of it (twisted wire which we all carried for extracting wads), and after some prodding began to turn it and then hauled him. Joy, here was a large fine beaver, and I commenced to dance with delight as it was my first one. It was now quite dusk and we started for camp on the jog, and heavy was the welcome we received on reaching here, and before long we were enjoying a delicate dish from the choicest parts of the beaver, which, and I speak from experience, is very excellent food indeed, something between young pork and lamb.

Next day we were to visit the traps and repeat the watching in the even-

ing. The first trap was not disturbed, but in the second was a beaver, which we soon despatched. This trap was set in a tiny affluent of the creek which was very shallow with a stony bed, cut banks about four feet high, lovely soft moss on the bank, with scattered spruce and birch. As Pat specially looked after the traps, they being his own property, I lit my pipe and smuggled down in the moss for a quiet smoke, while he arranged everything in order and re-set the big double spring No. 4 beaver trap (no small task I can tell you). Nothing more to do now but d. stroy the traces of human scent; so finally he filled his mouth with water to spurt on the willows by which he was pulling himself up out of the creek. As he had a very hooked nose and round owl-like eyes, the sight of this apparition ascending from the creek, with his cheeks extended at their widest, was too much for my gravity, and I simply yelled with laughter. This so startled Pat that he left go the willows and dropped into his own trap in the creek. Great was the splash, and what sounded like Indian oaths filled the air. Rendered too weak by laughter to be of much assistance, I crawled to the edge of the bank and surveyed the scene. The chain to the trap allowed about two feet more or play and the Indian was caught fairly by his bare hams, his costume at that time being breeches, a long fur and leggings. He was in a most furious rage, and, finally giving up all struggles, he sat in the water with a most sulky countenance. After a number of ineffectual attempts, I at last succeeded in releasing him. His dignity was badly hurt, and though two more beaver rewarded our efforts, he sulked all day. When the story was repeated and acted in the lodge that night, his merry wife and boy howled with laughter, while Patrick sat and smoked with a most injured air, and for some days afterwards sat down very gingerly.

After spending several more successful and pleasant days, and securing sixteen beaver for my share of the hunt, it became time for me to return to duty. The hunting being still very good and Pat doing so well with his traps, I decided to go alone. So one fine morning, after loading my small craft with the fur we had killed, also two beaver unfurled for the Chief at Cumberland, I shook hands heartily with my late companions who took d at the parting. Then stepping cautiously into the canoe, away I went. On reaching the Saskatchewan I had to be extremely careful in navigation as my canoe was loaded to a few inches of the water, also the mighty river was full of drift-wood. I camped that night for the last time b-side the mighty river. Well the Gros moved it "Kisse-etchew-see-see," the big, swift flowing river, corrupted by the white man to Saskatchewan.

Want Embargo Removed

British Butchers Petition Government to Lift Embargo Against Canadian Cattle.

Ottawa.—Continuous representations are being made to the British Government for the removal of the embargo on Canadian cattle, but the replies received convey little promise of this concession. Forty thousand British butchers recently petitioned the authorities to lift the barrier, but were told that, while Canadian cattle may be all right there is danger from herds getting infected from the United States. This theory is discounted at the department where it is pointed out that, despite serious outbreaks of foot and mouth disease in the States, not a single case has come over the border. There is a limited privilege whereby cattle may be shipped alive to certain specified places in England if slaughtered within ten days, but this is not sufficient for finishing up the fattening process after loss of weight in transport.

Another Political Campaign

Drury and Crear Will Support Farmers' National Policy.

Winnipeg.—A mass meeting will be held in Winnipeg early in December at which Hon. E. C. Drury, premier of Ontario, and Hon. T. A. Crear, leader of the farmers of the west, will speak in support of the new national policy. This will be the beginning of a series of meetings throughout the province of Manitoba to advocate the new policy of the national party, and the campaign will be held under the auspices of the United Farmers of Manitoba. The date of the first meeting will be announced in a few days.

To Make Work Effective

Canada and States Join in Fighting The Whiskey Runners.

Windsor, Ont.—The international boundary line will no longer present a barrier to American and Canadian officers in pursuit of rum-runners upon the Detroit River.

Following a conference in Detroit some days ago, it was decided that to make the campaign along the border against rum-runners more effective, an American officer should accompany Canadian license squads in their expeditions and vice versa.

Refuses War Trophies.

London.—Australian cables report that the City Council of Sydney, which is mostly made up of Labor elements, has refused to accept the offer of war trophies from the Federal government, and will take no part in the conference for their distribution.

Wants Freight Rates Adjusted.

Toronto.—The Canadian Manufacturers' Association has made application to the Board of Railway Commissioners asking for the earliest consideration of the question of equalizing freight rates between Western and Eastern Canada.

Junk Ex-Ka's Statue.

Meitz, Germany.—The town council here has decided the statue of the ex-king as old bronze, and with the \$15,000 raised, build two statues for the town square. One is of the French soldier and the other of the French patriot, Paul Deroulle.

SHORT OF BREATH Could Hardly Walk Without Resting.

When you go to a physician to be examined for any heart trouble one of the first questions he asks is: "Are you short of breath?"

Now, when the heart becomes affected there ensues a feeling of a choking sensation, a shortness of breath, palpitation, throbbing, irregular beating, smothering, nervousness, dizziness and a weak, sickly, all-gone feeling of oppression and anxiety.

On the first sign of the heart becoming weakened or the nerves impairing Millard's Heart and Nerve Pills are just the remedy you require. They regulate and stimulate the heart, and strengthen and restore the whole nerve system.

Mr. Stephen Crouse, Chief Clerk, writes:—"I suffered for five years with heart trouble. I could hardly walk from the house to the barn without resting as I used to get so short of breath. Doctors could not help me. My wife told me to get a box of Millard's Heart and Nerve Pills and I felt better after taking them; three boxes made me quite well. I am now hiring my son to work the farm, and can truthfully say I feel like a different man."

Price 50c, a box at all dealers or mailed direct on receipt of price by The T. Millard Co. Limited, Toronto, Ont.

Next U.S. President

Senator Warren G. Harding, of Ohio, who succeeds Wilson at the White House.

Big Immigration Movement

Encouraging Entry Into Canada of Farmers and Farm Laborers.

Winnipeg.—The Ottawa correspondent of the Manitoba Free Press says: It is estimated here that the immigration movement into Canada for the present year will approximate 190,000, and new comers being very largely from Great Britain and the United States.

This total is considered highly satisfactory for the first year post-war, especially in view of the fact that the policy of the department at the present time is to encourage the entry into Canada of farmers, farm laborers and domestics only. The high water mark in Canadian immigration was reached in 1913, when 443,436 persons entered the Dominion.

For the first six months of the present fiscal year a total of 95,005 persons entered the Dominion, an increase of 38 per cent. over the movement for the corresponding period last year. In the matter of origin they were divided as follows: British, 52,768; United States, 30,763; other countries, 11,474.

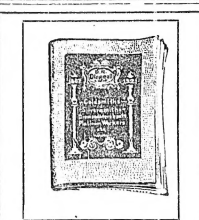

Absolute Prohibition in U.S.

Washington.—Home brewing was brought actively under the prohibition ban when it was learned that enforcement officials had ruled against the sale of hops and malt to bakers and confectioners.

Prohibition officials admitted that the Volstead Act had been construed to mean that the sale of hops and malt as component parts of home made beer was unlawful and must be stopped.

Want Federal Assistant.

Montreal.—The Herald says that "The Canadian Sugar Refiners are again making representations to the Dominion Government in the hope of securing federal assistance, financial and otherwise, to enable them to meet the unprecedented situation which has arisen in the Canadian sugar trade."

May Now Admit Former Enemy States To League of Nations

Geneva.—Lord Robert Cecil, one of the chief authors of the League of Nations' covenant, who is coming to the assembly of the League as a delegate from South Africa, will support the proposed immediate admission to the league of former enemy states, it is expected here. Italy, Switzerland, the Scandinavian states and some of the South American nations are understood to be favorable to such a plan.

France, Belgium, Rumania, Jugoslavia and Czechoslovakia, will resist the admission of Germany and Hungary, although they are not unfavorable to Austria and Bulgaria. There are indications in League circles that the drift toward admission of former enemy countries is strong, and likely to reach the necessary two-thirds of the members, unless a compromise is effected. The sentiment is growing that, whatever may be the merits of the case, the

discussion in the assembly is likely to develop a sharp controversy which the leading members of the League desire to avoid. At the first session it is probable the immediate admission of Austria and Bulgaria will be proposed, and an effort made to have action in the case of Germany postponed to another meeting of the assembly, probably in the spring. Attention is being directed to the anomaly of admitting Germany while she is still technically at war with the United States.

May Meet at Ottawa

Meeting of Empire Prime Ministers May Be Held in Canada.

London.—Premier Lloyd George stated in the House of Commons that arrangements had been made to hold a meeting of prime ministers of the empire in June, 1921. It was asked if an undertaking could be given that no decision would be come to regarding new questions as Mesopotamia until the premiers met.

Premier Lloyd George replied that such a proceeding would be quite impossible. He said: "The expense, after all, is not on the empire, but on Great Britain."

The premier added that the question of holding the premiers' meeting at Ottawa had been under consideration.

Message from Arctic Explorer

Capt. Amundsen Sends a Telegram That All Is Well.

Copenhagen.—Captain Amundsen, the Arctic explorer, has sent the following telegram to the Berlingske Tidende, from East Cape, Siberia, bearing date of August 13: "We sailed from Nome immediately after my wife of August 8, with only three men, as the others claimed wages of \$300 sterling monthly. The following day we were held up by pack ice in Behring Sea. All aboard well."

The foregoing is the first direct message from Captain Amundsen since he set out on his Polar expedition from Nome, Alaska, in the ship Maud, August 9. Five weeks later information reached Nome that the famous explorer's ship had become wedged in ice twenty miles off Cape Serge, 225 miles northwest of Nome, on the Siberian coast.

Prefers Work In West.

Calgary.—Capt. Evan J. Edwards, imperial trade commissioner to Canada, told Albertans that he found his work easier in the west than any other place. He ascribed this to the breadth of the people and their foresight.

Paralyzing Blow is Directed at Sinn Fein Finances

Seizure of Funds is Said to be Crippling Rebel Activities.

Toronto.—A special cable from London to the Toronto Star says: Britain's paralyzing blow at the Sinn Fein is directed at its pocket-book, according to the Irish office today. The office disclosed there was a marked cessation of Sinn Fein activity following bank raids in which records and funds were located. Steps have been taken to check off the supply of money from America also.

A report of the Sinn Fein Minister of Finance showed £22,607 set apart

for the "S-I-Determination Fund." It also showed £200,000 (nominally \$1,000,000) had been received from America in subscriptions to the Irish Republican Fund. A fund of \$2,995,643 was also shown to be on deposit in New York.

An O'Brien, secretary of the Irish Self-Determination League declared British raiders seized £20,000 from one bank, but that the amount was made good to the Sinn Fein by the banker who had the funds in charge.

Plan Relief Expedition

Will Send Relief to Schooner Ice-bound Off Siberia.

Seattle, Wn.—None, Alaska, residents are planning to send a snow sled relief expedition across the frozen Arctic to the trading schooner Polar Bear which is trapped in ice off the Siberian coast, 225 miles from Nome, according to reports received here. Reindeer will pull the sleds.

The Polar Bear has a crew of five men and less than two months' supplies aboard. The boat is believed to be within 50 miles of the wharf at Maud, on which, Raulf, Alameda, Norwegian explorer, is attempting to reach the North Pole.

Bring Turks to Time

Allies Consider Ultimatum to Force Treaty Ratification.

Paris.—A despatch to the Havas Agency from Constantinople says: "As the Turkish government continues to postpone the execution of certain undertakings required by the Allies, notably the ratification of the treaty of Sevres by the Imperial government, the trade and financial aid given the Ottoman treasury will be curtailed. If that measure does not produce results, the delivery of an ultimatum is being considered."

London.—The incorporated society of authors is sending its secretary, G. Herbert Taring, on a mission in connection with questions of copyright to Canada.

THE SEEING EYE

Principal Reynolds, of the Ontario Agricultural College, thus delivers himself in the Agricultural Gazette of Canada:

The teacher who hopes to take a right place in the life of the country school district must cultivate the seeing eye and the understanding heart for persons and things rural. The usual, popular, melodrama, comic supplement, moving picture conception of the farmer and of country people must be forgotten. It is essentially and perniciously false. The farmer is something of a humorist, and takes delight in deceiving the simple-minded by a somewhat unfinished exterior. The city-bred person makes the fatal mistake of judging by outside appearances. To the city-trained eye there are two classes of persons, one wearing overalls and the other wearing white collars. The former class work with their hands. The latter class work with their brains. That is the superficial judgment, which ignores the fact that there is a very great deal of clear, hard thinking done today by the men wearing overalls. At any rate, the farmer belongs to both classes. The more he understands of those discoveries, which it is the business of the agricultural college to make, the more he absorbs the teaching which it is the business of the college to spread abroad, the better farmer will he be.

Our friend "Mac" who, we understand has an important engagement with a nice young lady and a minister sometime this month, was very busy the other evening preparing his new home for the bride. On this particular evening he chanced to pay "Mac" a visit, and found him struggling with a stove pipe which refused to fit. Knowing the frailties of human nature, we decided to leave "Mac" and the stove pipes alone to settle the dispute.

Now for the benefit of anyone else who may have to put up stove pipes we give the following advice: In the morning breakfast on a light nutritious diet and drink two cups of strong coffee. After which put on a suit of old clothes—or new ones if you can get them on time—put on a pair of old gloves, and when everything is ready to strike the fatal blow, go and get a good hardware man who understands his business.

The life of an editor was saved recently by a silver dollar in his pocket. A crank shot at him and the ball struck the dollar. Now should we happen to get shot before you pay your subscription and there is no dollar to stop the ball, we shall always presume you might have saved our life.

Those who intend to curl this winter are requested to hand in their names to the secretary, R. R. Dunn.

help you to plan your trip, or write Mr. J. Madill, District Passenger Agent, Edmonton, Alta., for handsomely illustrated literature and full particulars. "The National" Western Canada's popular train runs every day between Winnipeg and Vancouver, via Saskatoon and Edmonton. Fine service is assured.

Notice To Creditors And Claimants
(This advertisement is not to exceed 4" single column in any newspaper)

NOTICE

In the Estate of Herbert Stanley Kinch late of Cereal, in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named Herbert Stanley Kinch who died on the 1st day of November, 1918, are required to file with Walter M. Crockett Youngs-town, Alta., solicitor for the Executor by the 10th day of January, 1921, a full statement duly verified of their claims and of any securities held by them, and after that date the Executor will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

Dated this 10th day of November, A.D. 1920.

Walter M. Crockett,
Solicitor for the Executor
Henry Kinch.
ADDRESS:—Youngstown, Alta.

TENDERS

Wanted by the Board of Trustees of Chinook C. S. D., tenders for the season's supply of coal in carload lots. Also prices on 4 or 5 cases of bricks for foot warmers.

Tenders to be sent in before November 25th.

LORNE PROUDFOOT,
Secretary.

TENDERS

Van-drivers wanted for Chinook C. S. D. for the year 1921. Tenders for the routes as they are at present will be received by the Secretary or the Chairman up to Saturday noon, Dec. 11th. Route No. 2, the Dressel Route, will be from April 1st to the end of the year.

Tenders for position of Janitor for the year will also be wanted.

Lorne Proudfoot, Sec'y.

C. W. Rideout, Chairman.

It takes a rich man to draw a cheque, a pretty girl to draw attention, a horse to draw a buggy, a porous plaster to draw skin, a toper to draw a cork, a free lunch to draw a crowd, and a well displayed advertisement in this paper to draw trade.

THE POINT

"Do you say that your hens 'sit' or 'set'?" asked the precise pedagogue of the busy housewife. "It never matters to me what I say," was the quick reply. "What concerns me is to learn, when I hear the hen cackling, whether she is laying or lying."

TAX SALE

Sale of Lands in the Municipal District of Coliholme, No. 243, for Arrears of Taxes.

NOTICE IS HEREBY GIVEN that certain lands in the Municipal District of Coliholme, No. 243, will be offered for sale for arrears of taxes and costs, unless the said arrears of taxes with costs are paid before the date of the sale. The sale will be held on Saturday, the eleventh day of December, 1920, commencing at 10 o'clock in the forenoon, in the Assembly Hall of the Chinook Consolidated School.

A full list of the said lands may be obtained on application to the Secretary-Treasurer of the Municipal District, or may be seen in the issue of the Chinook Advance dated October 21st, 1920.

Dated at Chinook this 18th day of October, 1920.

LORNE PROUDFOOT,
Secretary-Treasurer.

NOTICE OF IMPOUNDMENT

NOTICE IS HEREBY GIVEN under Section 209 of the Municipal Districts Act that one dark bay gelding, weight about 1,100 lbs., small white spot on forehead, no visible brand, wire cut inside left fore leg, was impounded in the pound kept by the undersigned on the SW quarter of section 9, township 37, range 7, west of the fourth meridian, on Monday, the 28th day of June, 1920.

Dated at Big Spring this 17th day of September, 1920.

S. W. WARREN,
Poundkeeper.

Growth of Creameries And Butter Exports In Western Provinces

As late as 1914, Manitoba was a large importer of creamery butter, the province's imports of creamery butter for the year named being 20 carloads. In 1912 it had been as high as 55 carloads imported. Then in 1915 the province began to export butter and the amount sent out increased rapidly from year to year. Last year Manitoba exported 153 carloads.

This change of position from the importing to the exporting column has been a large factor in gradually altering some of the fundamental things in connection with butter manufacture, and the truth is that, without the public taste detecting it in any decided way, the Manitoba factories have changed the nature of their output almost completely during the past few years.

A few years ago the creamery butter was much nearer in character to dairy butter than it is now, says the Montreal Evening Herald. Then a great deal of quite sour cream was gathered and churned, the idea being held by many patrons of the factories that more butter could be made from 100 pounds of cream if it was quite sour than if it was comparatively sweet. The cream was churned without pasteurization, and the butter was liberally salted. This gave a high flavored butter—a butter with decided flavor in its unsalted state, and then with the particular tang which the salt itself contributed.

But when the Western Canadian provinces went into the export trade in a large way they found that the old way of butter-making was not so good as the new, and so the Dairy Branches of the Provincial Departments of Agriculture for Manitoba, Saskatchewan and Alberta, working more or less in concert, began a strong campaign to change a number of the butter-making practices.

They found, by experimentation, that the most satisfactory butter for the long cold storage, that is essential in the export trade, was a milder, cream flavored butter, made from cream that is practically sweet, and which is pasteurized before churning and salted only very mildly. Contrary to the prevailing opinion, it has been found that salt has been over-used as a butter preservative; that in many cases it was hiding the change in flavor which marked the change in condition of the butter, rather than actually preserving the butter from change. And so, after years of campaigning, practically all the creameries of Western Canada—certainly all the clearing creameries—are now making an almost sweet cream, pasteurized, lightly salted butter, and this butter can be put into storage and taken out again twelve months afterward very little changed—an ideal export butter.

While it is easy enough to tell of this change, it has needed very strenuous work to bring it about.

Hogs and Bacon Will be Scarce

Certain That Hog and Bacon Prices Will Remain High.

Some farmers have been quick to grasp the lesson for 1921 in the sharp decline lately in the number of breeding sows. A canvass of hog breeders in Ontario in the last two weeks shows that the trade in young stock to replenish the supplies on farms has not for many years been more active than this fall. One well-known breeder in Ontario states he is almost sold out. With twenty-five years' knowledge of the Canadian bacon trade, he attributes this to the fact that farmers have come to understand that there is "sure money" for the man who can breed for litters next spring.

Yet the awakening has to go further. In some sections of the Prairie Provinces the loss was as much as 70 to 75 per cent, compared with two years ago. In the Eastern Provinces also marked reductions have been recorded. Not until every farmer understands that it is best to keep or secure and to breed at once his normal number of sows will conditions begin to be steadied.

The importance of a quick recovery cannot be over-emphasized. The great harvest of feed grains now available will largely be disposed of at a loss if not fed to livestock. Prices for hogs today compare more favorably with the price of grains than for some time and the demand exceeds the marketings. Canadian overseas markets demand steady support if they are not to be lost.

In no line of livestock is the supply so cut down. It is already certain that hog prices and consequently bacon prices will remain comparatively high next year. Whatever is done to restore supplies must be done quickly. The breeding season for pigs begins in the first week in November and continues only until about the middle of December. If the opportunity is allowed to slip the recovery in numbers will be so retarded that our present cheap foods will be still more cheapened, leading to loss.

Mexico's Oil Resources

In One Year Would Produce Double of World's Production.

If Mexican oil wells were permitted to flow to their full capacity they would have produced 881 million barrels of oil in the past twelve months, or double the entire production of the world, according to Engineer L. Stamps, who is a member of the party of Mexican Government officials, headed by General Jacinto B. Trevino, minister of commerce, industry and labor, which visited San Antonio a few days ago. "The petroleum resources of Mexico are enormous and data obtained by a recent survey of the petroleum-bearing land in that country show that they aggregate one-third of all the countries of the world. The estimated oil lands cover 157,950,000 acres. Of this vast acreage, only 54,720 acres are in actual exploitation.

Urges Modesty in Dress

Styles Are Becoming Indecent. Claims Mrs. C. H. Campbell.

Mrs. Colin H. Campbell, provincial president for Manitoba of the I.O.-D.E., has issued a call to the members of the order to dress modestly and simply. "Fashions are becoming more extreme and more indecent with each succeeding season," is her opinion as voiced at the autumn meeting of the provincial chapter. Mrs. Campbell also strongly urged the encouragement of Canadian publications "to replace the insidious poison which is coming into Canada through the American magazines and papers."

Mrs. G. O. Hughes' address on housing for women, especially with regard to immigrants from the British Isles, resulted in the passing of a resolution to consider the founding of a chain of hostels across Canada for women.

French Press Is Pleaded.

The procedure reached by France and Great Britain upon the procedure to be followed in settling the German reparations question is received with satisfaction in the French press.

The procedure embraces as its first stage the conference of experts at Brussels; second, a meeting of allied and German representatives at Geneva; third, representation of the findings of the first two conferences, and fourth, a meeting of the premiers to consider the commission's decision.

A poet tells us that babies are new waves on life's oceans. Wrong! They are fresh squalls.

Prominent Railway Official

MR. S. J. HUNGERFORD.

Receives New Appointment

Now Vice-President in Charge of Operation and Maintenance of C. N. Railways.

Samuel J. Hungerford, who has been appointed Vice-President in charge of Operation and Maintenance of Canadian National Railways, is of the type of man, young in years and old in experience. Born near Bedford in Quebec, in 1872, he was only 48 last July, but he has been engaged in the business of the "rolling wheel" for 34 years.

As a boy of 14, at Farnham, Quebec, he first really became acquainted with a railway locomotive. Mechanically speaking, he boarded it then and has made it carry him from the lathe of the machinist's apprentice to the chair of the Vice-President of the system, when the Grand Trunk system is included, the world's greatest railway.

Mr. Hungerford is a man of quick action who never seems to be in a hurry. He has a wide circle of friends in the railway world—friends that he made while mastering his various jobs in the Mechanical Department at important railway points clear across the country. Any of these friends, officer or employee, Eastern or Westerner, will say that "S. J. is there with the goods," and that he knows a locomotive and a car from the rails up and how to utilize them to the best advantage. He has the reputation of being past-master in the art of handling men, of one who cannot be beaten on wage negotiations, and of one who is an all-round diplomat but firm as the proverbial rock when necessary.

The job of Operating Vice-President is one of the most important in railway service, and, as the Canadian National is easily among the biggest of railway systems, S. J. Hungerford's new job may be classed in like proportion.

He will have the direction of forces that spend more than 90 per cent. of the total operating expenses of the system, and these on the present scale (including the G.T.P.) and with the present scale of expenditure, amount to 167 million dollars per annum. It is Mr. Hungerford's business to see that the great expenditures of money day by day on the publicly-controlled road are so made as to insure the largest return in condition of track structures and equipment, and the movement of the largest amount of traffic possible. Those who know S. J. Hungerford well, have complete confidence in his capacity. He is regarded as one of those men who, with the President, Mr. D. B. Hanna, will set new standards of devotion to duty and loyalty to employers—in this case the general public of Canada.

Industrial Centre of Western Canada.

Facts and figures which will be used in the tariff enquiry to establish the strength of Canadian industry, have just been made public by the Bureau of Statistics, and show that at the end of 1918, when the information was gathered, the city of Winnipeg, Manitoba, has 779 industries with a capitalization of \$28,799,029, employees to the number of 19,181, a payroll of \$18,773,622 and an output of \$118,154,991.

Hemp in Manitoba.

The first venture into the hemp industry, launched last spring by the Western Fibre Company of Winnipeg, will result in a successful first year, according to report. There were 526 acres of hemp sown by the different farmers of the Niverville district and the probable yield is around 300,000 pounds. With the price at 20 cents per pound, the company will realize \$30,000. Seed cost the company about \$8,500 and machinery a little over \$20,000. So that with a moderate expense for the first year's operations will show a small profit.

A man's ears are placed so that he may catch all things said to his face. It was never intended that he should hear the things that were said behind his back.

W. N. U. 1342

Produce New Wheat Which Will Do Well In Northern Districts

As a result of experiments which have been carried on by the field husbandry department of the Manitoba Agricultural College, a new wheat has been produced which, it is expected, will find a place in the north.

This statement was made by Prof. T. J. Harrison at a conference of officials held in Winnipeg recently.

Prof. Harrison said he did not know how the new wheat compared with Ruby wheat, but he believed it was wheat that would be of some value in the northern districts.

Another interesting announcement by Prof. Harrison, was that 1,500 bushels of wheat seed of different varieties has been produced on the college experimental field, and 350 bushels on the demonstration farm at Rennie. The seed had cost the province considerable money, and he did not want to scatter it broadcast about the country and so lost control of it.

It was the intention to distribute the seed in a way that would ensure that when it was propagated it would go into the seed line, and not into the elevators.

W. C. McKillopen, of the Dominion Experimental Farm, Brandon, spoke of the agronomic work being done, and declared that satisfactory progress was being made with the testing of grain varieties and soil investigation. Speaking of rotation work, he said there were eight rotations under test. These covered the straight grain growing system without the application of manure, and the same system with manure applied. Other experimental work is being carried out with combinations of grain crops

and grasses, and there is also a long rotation which includes alfalfa as the main feature. In addition, there are field areas large enough to be conducted as farm fields. Track is kept of the work done on these rotation fields, so that the experiments are carried out on an economic basis and the results are measured in dollars and cents. Mr. McKillopen stated that publication of the full reports of the work had been stopped for some time. Summarized reports had been issued, but these were of little practical use, and he was glad to announce that in future full reports of the experiments would be issued in the form of bulletins. The first of these would be issued in the spring, probably.

C. Stewart, of the Dominion Seed Experiment at Calgary, said good work had been done in the establishment of seed centres in Alberta, of which there are now seven, while there are fifteen districts which want such centres established. He gave details of a combined seed crop and clean seed competition, which, he said, was proving very popular.

Speaking of alfalfa seed which had been distributed by the C.P.R. in some districts of Alberta, Mr. Stewart said it had been inspected and found of good quality. The department hoped to give it recognition, so that any person buying that seed would have a guarantee that it was genuine seed and would be protected. For some years some very inferior seed had been imported into Canada, and two years ago the department had enforced the Seed Importation Act.

Valuable Clays in B.C.

Bentonite, A Soluble Clay of Great Commercial Value Is Found at Merritt.

A valuable discovery has recently been made at Merritt, British Columbia, as a result of an inquiry from the British Imperial authorities, asking for information as to possible deposits in Canada of bentonite, a valuable light yellow soluble clay, in appearance something like soapstone for which great industrial possibilities are developing. It is all the more valuable for the reason that there are very few known deposits in the world, the principal, so far as commercial extent is concerned, being in Wyoming, U.S.A., where it occurs in connection with coal deposits similar to those of Nicola Valley.

After looking over small deposits of the principal, at Merritt, the best bentonite as the samples taken appear to be, is a soluble clay, composed of the finest imaginable atoms and absolutely free from grit. The clay, which is as hard as a rock, so that it has to be quarried, when dry, almost instantly dissolves when placed in water into a perfectly smooth, creamy substance. It is used in paints as a filler for finishing papers and for certain textiles, and a greatly increased demand would appear to have recently developed, partly owing to the scarcity of the article.

Weight of Metals

Something About the Lightest and Heaviest Metals Known.

Anybody who has handled a gold brick must have been astonished to find how heavy it was. Gold is, in fact, twice as heavy as lead. Yet it is not the heaviest of metals. That rank is held by osmium, which is one-sixth heavier than gold.

At the other end of the scale of weights we have lithium, which is so light that it will float on water. It is queer stuff. Put a small chunk of it on the table and you will soon observe that it is growing smaller. Before long it will disappear entirely, having been vaporized. Magnesium is nearly three times as heavy as lithium; yet it is considerably lighter than aluminum, which we are accustomed to regard as remarkable for its lightness of weight.

Up To Date.

"How useless girls are today. I don't believe you know what needles are for."

"How absurd you are, grandpa," protested the girl. "Of course, I know what needles are for. They're to make the gramophone play."

The lyre bird can imitate the bark of a wild dog.

Winter Holiday Resort

A Delightful Trip Through The Canadian Rockies to the Pacific Coast.

Shortly after leaving Calgary the route of the Canadian Pacific Railway winds for some distance through the foothills before plunging into the fastness of the mighty Rockies. Then for over five hundred miles a continuous panorama of bewildering magnificence is presented, which no pen can adequately describe. Vast open glacial fields, startling precipices, snow-capped peaks, wide forest areas, clear lakes and peaceful valleys combine in enchanting array. Add to this the 165 miles steamer trip on the palatial Princess steamers from Vancouver to Victoria and Seattle on Puget Sound, the most charming inland voyage known and you have a pretty fair idea of what the Canadian Pacific has to offer the traveller to the Pacific Coast.

Vancouver Island is recognized as Canada's all-year resort, where golf, motoring and other outdoor pastimes may be enjoyed every day in the year. Thousands of miles of magnificent motor roads radiate from Victoria to various points of interest.

A visit to the coast that does not include a few days at Victoria cannot be justified. It is rather a pity to spend the time "doing" cities that are in most of their essential features very much alike, if it means eliminating Victoria, when by a four-hour sail by steamer on one of the most beautiful stretches of inland waters in the world, your trip may take on all the characteristics of a foreign tour.

A trip to the Pacific Coast this winter will be time and money well spent. Any Canadian Pacific Agent will gladly furnish particulars and any information which may be required.

Large Grain Shipments.

Approximately fourteen million bushels of grain have been threshed in the Lethbridge district of Southern Alberta. Shipments of wheat up to the end of October have totalled in the neighborhood of nine millions and shipments of other grains have reached closer to one million three hundred thousand. Grain in store at the present time is estimated to be three million bushels.

High Hopes.

Mr. Hardfax—You seem to be growing prettier each day.

Miss Mugge—Thank you for the compliment. I'm glad you think so.

Mr. Hardfax—Yes, if you keep on being a way you stand a chance of being a fairly good looking old woman if you live long enough.

Pussyfooting.

Passenger—Is it raining, porter?

Porter (with a groan)—No, it's raining water—London Tailor.

Joys of Rural Life

Community Work Means the Development of a Moral Purpose

There is much of adventure in hunting, hills, and woods and prairie for hidden treasures in the way of rare flowers, insects, animals, birds, and studying their ways; the finest kinds of competitions can be held in this way; a community museum can even be started, and a thorough knowledge of our own district must lead on to the desire to extend our knowledge to other fields.

From an interest in nature and its works around us, will be developed an increased interest in humanity and its ways. The different races of our country, their romances, and history will excite a desire to know and understand them—another study for the explorer's spirit. All these interests would lead to an increase in the feeling of community responsibility and a real citizenship.

Interest in community work means the development of a moral purpose in life; it means an awakened intelligent citizenship, it means the birth of the co-operative spirit which is the only means by which civilization can progress upwards; it means Christianity in action. To develop it in the young people needs organization, needs leadership. The young people are ready for it, it's up to the people to provide it.

The boys and girls are responsive enough, given the right lead, but this must come principally in the rural districts from the parents in the homes and the schools. The schools are rapidly waking up, but their work will be infinitely delayed if the parents maintain the attitude of indifference so often met with to-day.—Mrs. W. H. Parley, President, U. F. W., of Alberta.

Green Is Nature's Color.

Green is a restful color. Oculists say that of all colors green is the most friendly to the optic nerve. In lands where eternal snows or eternal white sands flash up their glaring reflections, men have to shade their eyes or go blind. In green grass never bothers the eyes. One can stare a forest in the face all day with impunity. Nature's greens never get on our nerves.

The Silver King.

To buy a silver mine at a sheriff's sale for \$300, the property being sold to pay wages due the purchaser and then to sell the mine a few years afterwards for \$75,000 has been the good fortune of Pedro Salina of Aliste Arm, British Columbia, who just disposed of the Esperanza mine to a group of Vancouver men.

World's Smallest Coin.

The coin of the least value ever issued is the "millet," so-called, which is the widow of the Bible contributed to the poor. Its shape was hexagonal, and its value about one-fiftieth of a cent. It would take five thousand millets to make one dollar.

Built Fake Paris

Disclosure of Camouflage to Deceive German Air Raiders.

A sensation has been caused by the revelation of the secret plans of a "fake Paris" built about fifteen miles outside the city limits to attract German Goelias during their night raids, thus preserving the real Paris from their bombs.

By means of thousands of wooden laths, miles of canvas and a series of railroad stations, trains and factory sites were created which imitated to perfection the real ones.

The Eastern Railway station, about ten miles north of the city with its buildings, moving trains, signals, and a factory nearby apparently going at full blast.

To stimulate a station, wooden framework was covered by transparent canvas. Lit from below the effect was that of huge vaulted domes like the real railroad stations. When the Goelias were signalled the lights were lowered suddenly to make it seem an attempt was made to hide the station in darkness.

For more than two miles beyond the fictitious station were fictitious trains composed of a series of wooden panels, the size of the usual railroad car, placed flatly on the ground. To both sides of the panels ran a border of light which from above, seemed like the reflection of the light from the windows. Special electrical arrangement made it appear, at times, as if the trains were moving.

Minute plans had been made to transmit a false "heart of Paris," the Saint Germain forest, some fifteen miles away, while about twelve miles to the west, a huge factory town was to have been simulated. The armistice, however, prevented the carrying out of these plans, and Mr. Jacquet, the inventor of the ingenious "town camouflage system" is now looking for another way with other air raids to be able to perfect his ideas.

Friendly Intercourse Again

German Professors Are Willing to Extend the Olive Branch.

German university professors and members of the reichstag have drawn up a reply to the appeal for re-establishment of the "friendly intercourse" which existed before the war, which the professors and doctors of Oxford University recently addressed to professors of arts and science and members of universities and learned societies in Germany and Austria.

"Science knows only one aim—the search after truth—and it requires for the performance of this task the common labor of all, regardless of national boundaries," says the German reply. "The war interrupted this joint labor and dissolved many personal ties. We are ready to resume these connections and by common labor to relegate to oblivion everything offensive, spoken or written, in both camps."

Winnipeg - Calgary
Edmonton

Aerial Route to Fort Norman

Establishment of Landing Places and Supply Stations Discussed.

The establishment of an aerial route from Edmonton to the oil fields of Fort Norman on the Mackenzie River is the latest talked of development in connection with the pressing transportation problem existing as a result of the Fort Norman point being so far removed from the business centres of Alberta. Edmonton aviators are entering into negotiations for such a route with a view indicating that as little time as possible will be wasted in the preliminary arrangements.

The proposal is a big one in that it calls for the establishment of landing stages at intervals along the line of route, and the transportation, in the first instance, before flying, of gasoline and other essentials for the successful operation of flying machines. The distance to Fort Norman from Edmonton is about 900 miles, as the crow flies. The span is not a great one, as applied to flying distances, and three or four days at the most would be sufficient to accomplish the distance when once a reliable service of planes is established.

The whole idea is looked upon with favor, and while its introduction might not become an accomplished fact until the spring of 1921, anticipations can be held that such a service will become actual with the spring of next year.

As it has become an absolute necessity to provide a new means of communication between the outposts of the far north and the supply bases in Edmonton, an effort to have wireless stations established in at least nine important points is being made by H. A. Mackie, M.P. The stations would be established at McMurray, Peace River, Chipewyan, Fort Vermilion, Hay River, Fort Smith, Simpson, Resolution and Norman.

Sprouted Grain

Planting of Sprouted Grain Is No Good In The West.

Sprouted grain planting, the system said by M. Pion-Gaud, the Luther Burbank of France, to threaten the revolution of grain growing is not practicable in Western Canada, according to George H. Hutton, superintendent of the agricultural branch of the C.P.R.'s department of natural resources.

Any machine that could be used for sowing seedlings would knock off the sprouts and destroy the germinating power, he says. The plan submitted by Pion-Gaud provides for the leaving of grain in heaps till it sprouts, but Mr. Hutton claims that the moving of such sprouted grain would impair its germinating value to a fatal extent. Bacterial solutions, however, are often used to help the germination of leguminous plants such as alfalfa and red clover.

Some writers never disturb the truth that lies at the bottom of the inkwell.

4087 THE PR

Hardy Variety of Garden Corn

Alberta Man Has Produced Cross Between Squaw and Sweet Corn.

As a result of a cross between squaw and sweet corn, an Albertan has produced a type of corn which is earlier in maturity than the ordinary sweet corn and possesses in many respects the hardness of squaw corn. The cross was made two years ago, and the seed which was carefully selected was planted again this year. The corn grown this year was quite uniform in type, and it is believed that a strain of garden corn that is superior to squaw corn and is well suited to the conditions in this country has been secured. It is a heavy yielder, has a splendid flavor, and at the same time possesses the hardness, characteristic of squaw corn.

In growth habit it is similar to squaw corn. The stalk is fairly short and the ears grow low down on the stalk. The cobs, on the other hand, are more of the size of sweet corn. The kernels are also larger and resemble sweet corn. The kernel is fairly light in color.

Of special advantage is the fact that this strain matures from a week to ten days earlier than the ordinary sweet corn. This, in Central Alberta, where the season for corn is comparatively short, is a decided advantage.

General Dairy Profits

Greater Average Production Competition For Dairymen.

For the third year in succession, the Saskatchewan Dairy Association, in conjunction with the Dairy Branch of the Saskatchewan Department of Agriculture, is again conducting a Great Average Production Competition. Eight cash prizes of the aggregate value of \$175, are offered as follows: First, \$50; second, \$40; third, \$30; fourth, \$20; fifth, \$15; sixth, \$10; seventh and eighth, \$5 each.

These are to be awarded to the owners or proprietors of herds of five or more cows on the basis of the average butter-fat production of whole herds for the twelve months ending December 31, 1920. To be eligible for a prize in this competition competitors must keep a record for at least six months of the year of the production of their herds in conformity with the rules laid down in the system in use by the Dairy Division, Ottawa, viz. they must weigh the milk of each individual cow three days each month, and have each cow's milk tested for butter fat content once each month, as required by the testing regulations. Forms for the keeping of records and full information regarding the work are supplied free of charge to dairymen in any part of the province.

The Dairy Commissioner for Saskatchewan, Mr. P. E. Reid, believes that the regular testing of individual cows would probably prove the most valuable feature of herd management that could be adopted. Large individual production means economical production. The object of this competition is to develop higher average production in Saskatchewan herds, which will result in greater profits through more economical production.

The Prince of Wales

Versatile Test Shown by Prince in Visiting Different Parts of the Empire.

The average inhabitant of the Dominions overseas, and particularly the Australians, is so profoundly different in his mental attitude towards Royal productions from one in England that it is no small feat of perception and of versatile tact for a Prince of Wales to strike the congenial note just as successfully at the Antipodes as in England or in France, where he was much liked by all the people who met him during the war.

This success gives good promise for the future. It is to be hoped, still far off, when the good-humored and considerate traveler of these last two months will be charged with all the complicated duties and delicate intonations of discretion which are the day's work of a modern king.

Nobody now would ask for profound statecraft or mighty intellect; power in a constitutional sense; such a conception is sure of filling his power without reproach if he has not these pre-disposing causes of the origin which disturbs. The king's qualities range in the secondary but amiable order of such social virtues as gentleness, social elegance and presence of mind and circumstantial good nature. These the Prince of Wales surely has and it may be he will, has loyally tried to cultivate, which, as most of us can say, is no light task. From the Manchester Guardian.

W. N. U. 1342

Grasshoppers on the Screen

1,000 Feet of Moving Picture Film Illustrating the Grasshopper Campaign.

Illustrating all phases of the grasshopper campaign, 1,000 feet of moving picture film have been taken by the Field Crops Branch of the Saskatchewan Department of Agriculture and these pictures will be used as educational propaganda on the Better Farming Train and at meetings at country points.

The series starts with the picture of a map illustrating the infested areas in 1918 and the year. Field crops are shown holding an organization meeting and the Minister of Agriculture is depicted signing orders for the huge amount of supplies which were used for poisoning the insects. The pictures also illustrate the movement of supplies to the scene of hostilities, their distribution and the mixing of poison bait. It shows how the high sea spread and piles of grasshoppers lay dead in the fields a couple of days later.

The picture terminates with an illustration of female grasshoppers depositing their eggs in preparation for the next year's hatch and a farmer ploughing his land deep in the fall, turning the eggs so far down that they will not hatch.

Thousands of Vigorous, Happy Girls and Women Endorse the Treatment.

BRIN'S KEEN APPETITE GOOD SPIRITS.

Women who are all played out, drooping, pale, nervous and irritable will certainly be greatly interested. So will folks who are embarrassed with pimples, rashes and pallid complexion.

The real joy of living is best known to those who keep the blood pure and the system toned by the use of Dr. Hamilton's Pills, a soothing tonic, laxative that puts health, vim and spirit into those who lack these qualities.

You'll be stronger, better nourished, in better spirits, and sleep better after using Dr. Hamilton's Pills. This wonderful medicine will do you good in a hundred ways. It will put spring in your step, an attractive brightness in your eyes, and your cheeks will be stamped the glow and blush of a June rose. All this is possible because Dr. Hamilton's Pills bring about vigorous digestion, perfect assimilation, pure blood, and a proper working of all the organs.

The benefits from Dr. Hamilton's Pills come about in a natural, soothing, easy way, and girls and women of all ages are advised to try this old-time family remedy, which is sold by all dealers in 25c boxes.

Holland Developing Her Coal Resources

Needs Over Six Million Tons Every Year.

Although an agreement between Holland and Germany provided that the latter is to supply 90,000 tons monthly to Holland, the Dutch government fears Germany may not be able to spare that much fuel now, and has worked out plans to increase Dutch coal production through Dutch mines in German territory near Eisleben, Germany.

Under government management production has increased 100 per cent, while private mines could only increase their output by 50 per cent. It is hoped that within 10 years Holland will be able to supply out of her own mines all coal she needs—about six and a half million tons per annum.

For years I have never considered my stock of household remedies complete unless a bottle of Minard's Liniment was included. For burns, bruises, sprains, frostbites or chilblains, it excels, and I know no better remedy for a severe cold in the head, or that will give more immediate relief than to use from the bottle through the nostrils.

And as to my supply of veterinary remedies it is essential, as it has in very many instances proven its value. A recent experience in visiting what was supposed to be a lost section of a valuable cow's udder has again demonstrated its great worth, and prompts me to recommend it in the highest terms to all who have a herd of cows, large or small. I think I am safe in saying among all the potent medicines there is none that cures as large a field of usefulness as does Minard's Liniment. A real trustful good for man or beast.

CHAS. K. ROBBINS,

Ontario Legislature Opens Jan. 18. Opening of the next session of the Ontario Legislature is expected on January 18.

The cleanliness of the sealed package appeals to the daintiness of a woman.

She knows that it protects the contents from dust, dirt, odors and moisture.

She will be doubly pleased with our new waxed board package—which we have adopted after several years of testing—because it is stronger, more secure and more completely air-tight; altogether the best container for tea that has yet been devised.

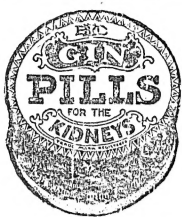

Red Rose Coffee is as genuinely good as Red Rose Tea

When Coal Fires Were Illegal

Nobility in Thirteenth Century Objected to Smoke Nuisance.

Coal has not always been so valuable a commodity as it is to-day. In the early days of the industry there was a violent prejudice against coal in many quarters, and the miners were often compelled to down tools against their will. Henry III., in the thirteenth century, began by giving the people of Newcastle the Royal permission to sell the new fuel and the manufacturers of the time immediately adopted it. But the nobility of the countryside made so ungracious complaints about the "smoke nuisance" that the King withdrew his permission. One of his successors, however, not many years later, restored the old rights to Newcastle, and also granted permission to the Derbyshire coalfields to begin work, but the fortunes of the trade varied from reign to reign. Even Queen Elizabeth, so broad-minded in many things, could not get rid of the idea that coal was not for the benefit of the country, and whenever the matter came up to London for the sittings of Parliament no one in the city was permitted to light a coal fire!

An extraordinary day for extended over Europe and part of Asia in 1783.

Former Kaiser Enjoys Freedom of Dorn

Dutch Government Relaxing Restrictions Placed on German Emperor.

The severe restrictions which the Dutch Government imposed on the movements of the former German Emperor at the time of the Kapp revolution in Berlin, at the request of the Allied Powers, appear to be gradually relaxing.

William now moves about more freely perhaps than at any time since he came to Holland nearly two years ago. These movements are, of course, confined to the territorial limits set by a royal decree, including the villages of Dorn and Amerongen, but inside this territory the exile is now fulfilling his dream of living the life of a Dutch country gentleman.

He goes frequently to Amerongen, to visit Count Bentinck, his former host, and to chat with the notary, Schroot, who is not only the former Emperor's business agent and attorney, but also more or less of a personal friend.

William also calls on a number of families of the Dutch nobility who live around Dorn and Amerongen, principally those whose heads belong to the Knights of St. John, the order of which, as King of Prussia, the German Emperor was leader.

Dutch guards escort him on these trips but he goes whenever he likes. Dorn has lost all curiosity in the Hohenzollerns, and only the occasional tourist halts to stare at William's automobile as it passes in the streets.

Expression of Loyalty.

An expression of appreciation on behalf of King George to the message of loyalty sent him recently by the Army and Navy Veterans' Association of Canada has been received by Arthur E. Shaden, private secretary to the governor-general, who in turn has forwarded it to R. C. Irving, Dominion secretary of the association. The message to the King was despatched during the course of the annual convention held at Winnipeg.

Aerial Mail Service.

An aerial mail service has been inaugurated between Victoria and Seattle, U.S.A. From 400 to 600 pounds of mail is being carried on each trip.

No animal can be exported from Morocco without government sanction.

Skin Sufferers Read—

"I had a severe attack of Eczema," says Mr. Michael Tapley of Hudson, Sask. "My body was simply covered with eruption. I had tried everything, but nothing helped. I used Zam-Buk Medicinal Soap for bathing, and afterwards applied the Zam-Buk balm in liberal quantity. Soothing and comforting, this treatment soon brought amazing improvement. Persistence with Zam-Buk resulted in my skin becoming completely cured."

It's Zam-Buk You Need

Aviators Cut Fire Losses.

Fire losses in the forest reserves of Alberta are expected to be greatly decreased this season owing to the splendid work accomplished by the aeroplane forest patrol operating from Morley, in the opinion of a member of the department. Since the aviators started their work they have been able to spot out a number of fires and by notifying the rangers, the fires were extinguished before any appreciable damage was done.

Leap Year Hint.

He—I think your family name is such a fine one.

She—Do you? I get dreadfully tired of it.—Boston Transcript.

Almost every part of Puget Sound is made up of the largest trees in the world.

WHEN RHEUMATISM HITS YOU HARD!

Sloan's Liniment should be kept handy for aches and pains.

WHY wait for a severe pain, an ache, a rheumatic twinge, a long exposure, a sore muscle, a sprain, or lameness to make you feel work, when you should have Sloan's Liniment handy to help curb it as it keeps you active, and fit, and on the job? If you're waiting for it, remember, you're a big body to the world. Not the gratifying, clean, prompt relief that follows Sloan's Liniment. It's the best thing you can get for it. It's the most economical. 35c, 70c, \$1.40. (Made in Canada)

HOME-MADE BREAD
Home bread-making reduces the high cost of living by lessening the amount of expensive meats required to supply the necessary nourishment to the body. The increased nutritious value of bread made in the home with

ROYAL YEAST CAKES
should be sufficient incentive to the thoughtful housewife to give this important food item the attention to which it is justly entitled. Bread made with Royal Yeast will keep fresh and moist longer than that made with any other.
Made in Canada.

Cigarettes Illegal in Kansas.

The Kansas supreme court has upheld the state law forbidding the selling or giving away of cigarettes.

Requisite on the Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic, it far surpasses anything that can be administered.

The speculator who gets a straight tip often finds there is something crooked about it.

PILES
Do not suffer from this painful condition. Dr. Chase's Ointment will relieve you at once. It is a sure cure for hemorrhoids, internal and external. Sample box free by mail. Enclose 2c. stamp to pay postage.

MONEY ORDERS
Domestic Express Money Orders are on sale in five hundred dollars throughout Canada.

Changing Seed

Experiments Show Plan Has Nothing to Recommend It.

Many farmers still think it advisable to change their seed grain every two or three years. In the light of the work done by the various experimental farms of Canada, this practice has nothing to recommend it, while on the contrary, it has been shown that there are distinct advantages in not changing seed. By the use of a good fanning-mill it is quite possible to grow the same grain year after year on the same farm and maintain its productivity, provided that the grain is seeded early each season on well-drained, fertile soil. The seed should not be blamed for poor farming, which is most frequently the cause of the farmers' dissatisfaction.

Your Eyes
Grated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by **Murina Eye Remedy**. No Stinging, No Smarting, just Eye Comfort. At Your Druggists or by mail 60c per Bottle. For Book of the Eye write **Murina Eye Remedy Co., Chicago.**

How He Knew.

During a discussion on music a boy mentioned that he was able to recognize only one tune, the National Anthem.

When asked how he knew that he knew that particular tune, he replied that it was because when it was played everybody stood up.

Well Worth Trying. Sufferers from Asthma who have tried many forms of treatment without beneficial results should not succumb to despair. They should at once procure a package of the genuine Dr. J. D. Kellogg's Asthma Remedy. The remarkable record established by this standard remedy is convincing proof of its extraordinary merit in the treatment of this agonizing ailment. If you are one of Asthma's many victims try Dr. J. D. Kellogg's without delay.

Shepherds Who Walk On Stilts.

In the sheep raising lands of the South of France, in the shade of the snow capped Pyrenees, shepherds of large flocks are accustomed to walk on stilts to increase their range of vision over their charges. The stilts are convenient as they insure dryness when fording streams. These shepherds also wear sheepskin coats, and were it not for their great height would be hardly distinguishable from the sheep, when seen at a distance.

Minard's Liniment For Colds, Etc.

CASCARETS
"They Work while you Sleep"

Do you feel "sixes and sevens" today? Are you bilious, constipated? You feel headachy, full of cold, unrefreshed. Your meals don't fit—breath is bad, skin scaly. Take Cascarets tonight for your liver and bowels and wake up clear, racy and cheerful. No griping—no inconvenience. Children love Cascarets, too. 10, 25, 50 cents.

Smuts is Praised

His Action in Bringing About a Union of the Parties in South Africa Praised Strife.

The London Times says that General Smuts' patriotism and wisdom and that of the Dutch-speaking people who call him leader, has saved South Africa from the dark certainty of a civil war. They made attempts at reconciliation with Hertzog and the Nationalists, but always on the stern condition of no compromise with Nationalism, which the Nationalists would not concede. General Smuts has now made an appeal to all South Africans who believe in racial unity to reject Republicanism, which appeal has been enthusiastically received by his own and the South African party and also by Unionists which represents almost wholly the English-speaking South Africans led by Sir Thomas Smuts.

The new party to be formed may involve the complete disappearance of the Unionists. Both component parts of the new party, says the Times, make costly sacrifices, namely Smuts and his party, that of a formidable breach with men of their own race, and Smart and the Unionists that of the identity of their party with all its traditions and proper pride. Both will have the abiding consolation of the knowledge that devotion to their country's welfare is worth infinitely more than racial ties or party triumphs.

WHY ANAEMIA PREVAILS

The Strenuous Conditions of Life To-day Are Responsible.

Mothers who remark that girls today are more prone to anaemia than the girls of a generation ago, should look back at the surroundings in which they and their companions lived. They would easily see the reason in life's altered conditions to-

Now the school-girl's life is more strenuous; her more numerous studies, a severe task upon her strength. Also, girls enter business soon after leaving school—at an age when they most need rest and outdoor life. Their bodily development is hampered by the stress of working hours, hurried and often scanty meals. Girls are more liable to bloodiness today, but there is this consolation that, whereas doctors formerly regarded anaemia as a formidable ailment, it is now counted in tens of thousands. Such medicines as Dr. Williams' Pink Pills have restored to good health thousands of weak, anemic girls and women, simply because they contain the elements necessary to make new, rich, red blood which means good health and vitality.

When your daughter's strength fails and pallor, breathlessness and headache close their wayward company, remember that you can make her well and assure her healthy development by giving her Dr. Williams' Pink Pills to make good red blood. Remember, too, that for women of all ages Dr. Williams' Pink Pills are especially helpful in the many ailments that result from watery blood. They make women and girls well and keep them well. This is amply proved by the case of Miss Eva MacKinnon, Glamis, Ont., who says: "As a school girl I grew very pale and would get dizzy spells and sometimes vomiting. My condition was such that I was not able to attend school regularly, and my mother was very much worried about my condition. Finally she decided to give me Dr. Williams' Pink Pills and I took these for a considerable time, gradually gaining strength until I was perfectly well. It is some years since I took the pills and I have enjoyed the best of health, and I am certain pale, sickly girls will find new health if they give Dr. Williams' Pink Pills a fair trial."

You can procure Dr. Williams' Pink Pills through any druggist or medicine store or they will be sent you by mail at 50 cents a box or six boxes for \$2.50 by writing direct to Dr. Williams' Medicine Co., Brockville, Ont.

Canada's Position Good.

Basically, Canada's commercial position is a sound one and general business is far from being bad. The money actually realized from large crops is having a beneficial effect. The labor situation appears for the most part to be very much improved, states a report recently issued by the Royal Bank of Canada.

Cataral Deafness Cannot be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing cannot be recovered. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous

ONE HUNDRED DOLLARS for any case of Catarrhal Deafness was navigated for the last 1,600 miles of the way from Bermuda to Queenstown, Ireland, recently, by means of its twin screws.

HELPS A WEAK THROAT STRENGTHENS THE VOICE CURES BRONCHITIS

By Breathing the Healing Balsams of Catarrhoxone You Are Cured Without Using Drugs.

You breathe through the Catarrhoxone inhaler medicated air that is full of healing, soothing balsams, full of piney antiseptic essences that resemble the air of the pine woods in the Adirondacks. This piney vapor has a truly marvelous action on weak throats. It brings strength and healing to the bronchitis, stops the hacking, irritating cough, prevents hoarseness and difficult breathing. You can't find anything for weak throats on earth more beneficial than Catarrhoxone. It means heaven on earth to man that has had bronchitis, catarrh or throat irritation. You will realize this the first time you use Catarrhoxone which is a scientific preparation specially designed for diseases of the nose, throat and bronchial tubes. Get the large size, it lasts two months, costs \$1.00; medium size, 50c; sample size, 25c. All storekeepers and druggists or the Catarrhoxone Co., Kingston, Canada.

Alberta Exhibits

Preparations Being Made for the International Livestock Show at Chicago.

The agricultural and mineral resources of the province of Alberta will be demonstrated in a practical manner at the International Livestock show to be held at Chicago next month.

Grains, grasses, coal, oils and other specimens of the provincial resources are now being collected and will be exhibited under the personal direction of the Alberta Minister of Agriculture. The quality of the livestock raised will also be well demonstrated and it is expected that the exhibit from the western prairie province will bring back many coveted ribbons from the international.

A novel method has been followed in preparing the stock for the exhibition. The young animals were all presented by well-known Alberta cattle breeders to the agricultural department of the provincial university. The university has been preparing and feeding the prize stock and itself making all arrangements for their competition with the best that the United States can produce.

A Boon for the Bilious.—The liver is a very sensitive organ and easily deranged. When this occurs there is undue secretion of bile and the acid liquid flows into the stomach and sours it. It is a most distressing ailment, and many are prone to it. In this condition a man finds a reliable remedy in Parnee's Vegetable Pills, which will speedily correct the disorder.

Where Scenery Runs Riot

Pick Flowers in December at the Pacific Coast.

How would you like to pick flowers from your garden in December? Well, you can at the Pacific Coast in a climate so mild and temperate that it keeps you guessing when fall ends and winter begins; where scenery runs riot and golf is played on the most green courses every day in the year; where you may hunt, fish, boat, ride or motor on roads winding past towering mountains, rivers and lakes with ever changing scenery. Rent a beautiful bungalow for the season or stay at one of both of the magnificent hotels, the Hotel Vancouver of that city or the Empress Hotel in Victoria.

Viewing the majestic Canadian Rockies from an observation car on either of the two beautifully appointed daily Canadian Pacific trains on this line is a sight that refreshes and leaves memories for years to come. Illustrated literature and particulars will be gladly given by any Canadian Pacific Representative.

R.C.M.P. For Herschel Island.

The Royal Canadian Mounted Police are getting ready to send an expedition overland for about a year to Herschel Island, the Arctic whaling, sealing and exploration base. They will go way of Fort McPherson. Several policemen will make the trip from Dawson with dog teams. Preliminary shipments of supplies that will be needed along the road, started from Dawson several days ago. The party will take mail arriving at Dawson from the coast or other points.

Steered By Screws.

It rudder disabled by a storm, the steamship "Yukon" was navigated for the last 1,600 miles of the way from Bermuda to Queenstown, Ireland, recently, by means of its twin screws.

Wilhelm's Refuge

Ex-Kaiser's Flight Into Holland Was Pre-Arranged, Says German Officer.

The often repeated and often denied statement that the former German Emperor, William came to Holland with the pre-arranged consent of the Dutch Queen, Wilhelmina, is now made by one of the German officers, Lieut. Count Detlef Moltke, who said he himself accompanied the Emperor from Spa to Amerongen.

Moltke's article in the Journal of the National Fund of German soldiers, reprinted in the Dutch press, says that the Dutch Consul in Brussels, warned his Government on the night of November 10, 1918, of William's plan, and the Emperor, by telegram, asked permission of the Queen to enter her country.

On arrival in Holland, William was informed that the Queen had put Bentinck Castle at his disposal, asserts Moltke.

How Much to Marry Upon.

Out in Indiana a justice of the peace, who specializes in marrying, said a salary of \$10 a week was enough for a couple to marry upon. The pastor of the local Methodist Episcopal Church thinks different, saying the salary should be at least \$900 a year. Three other married men said no one should marry on less than \$50 a week, and a woman who was interviewed warned young couples it always would require \$10 to \$15 a week more than they estimated they needed to live.

The Oldest Man Living

If asked about his corns would say they don't bother him because he always used Putnam's Corn Extractor. For fifty years "Putnam's" has been the favorite because painless and sure. Try only "Putnam's," 25c at all dealers.

Steel Works For Manitoba.

A new era in the manufacturing of steel in Canada was introduced with the opening of the new open earth furnaces at Selkirk, by the Manitoba Rolling Mill Company. The new furnace has a capacity of from sixty to ninety tons of steel per day and additions will be made as business warrants them.

The Perfect Man.

A young king once asked a sage what kind of person he considered was the most perfect, whom it would be wise if all men would imitate. "The most perfect man," said the wise old man, "is not he who seems most perfect, but he who not only is able to discover that he is imperfect, but also strives through life to amend his faults as much as possible."

Minard's Liniment For Diphtheria.

Navigation of Rhine Extended.

Swiss engineers have perfected the plans for extending navigation of the Rhine from a point twelve miles above Basel to Lake Constance by using locks with hydro-electric power will be obtained.

Keeps Baby's Skin Healthy

If every mother could only realize the danger which lurks in the neglect of chafing and skin irritations she would not take chances on being without Dr. Chase's Ointment to apply after baby's bath.

It arrests the development of eczema and makes the skin soft, smooth and velvety.

50 cents a box, all dealers, or E. D. Smith, Regina & Saskatoon, Sask.

Local U. F. A.

The local U.F.A. met in the Chinook School last Friday evening. After the transaction of considerable business, a short program was enjoyed. Mrs. J.R. Miller rendered a very acceptable piano solo, and Mr. Watson gave an interesting talk on a very important subject—"Banking in N. Dakota."

There is a feeling in the local U.F.A. that farmers must prepare now for marketing next year's crop.

You are invited to attend the next meeting, Nov. 30, and to take part in discussing the subject being dealt with. Come out and get busy.

Three important resolutions are being sent up for consideration at the Medicine Hat conference this week.

Christmas in the Homeland

At this time of the year, with the Christmas season drawing nigh at hand, our thoughts are turned to "The Homeland," and the longing to visit the scenes of our youth is strong within us. That fine old Christmas spirit of "Good will toward men" prevades the world and our desire to spend this cherished holiday season with those nearest and dearest to us is felt in every heart. Make your plans now and let us help you by providing the "Way" with the greatest comfort and least possible inconvenience to you.

OPTIONAL ROUTES AND CIRCUIT TOURS**BOYS' WORK TO BE A BIG FEATURE AT RELIGIOUS EDUCATION CONFERENCE, DELIA, NOVEMBER 23RD**

These are the days of great and growing interest in boy life and boys' work. Churches, Rotary and Kiwanis Clubs, Chambers of Commerce and other organizations have caught a new vision of the importance and possibilities of the boys. It is a significant and encouraging fact that it is the men's clubs which are concerning themselves about the programs of boys' work being carried on in their communities.

At the session of the Religious Education Conference, to be held at Delia, November 23rd, boys' work will be given a large place. The various phases of this important subject will be presented and discussed. A special conference of leaders will be held at a supper, Tuesday evening, November 23rd.

Every men's organization should be represented and all leaders of boys' classes should plan to attend this important conference in order to learn of the programs being followed and the progress being made in this important field. The provincial leader is anxious to meet every man who is interested in boys' work and is ready to make his services available in any community where men are facing their obligation toward growing boy life.

The sessions of the conference will deal with work for children in the Beginners, Primary and Junior Departments of the Sunday School work for boys and girls, and young peoples and adult department work. All interested in the highest welfare of the young are urged to attend.

THE SCIENTIFIC STUDY OF FODDER PLANTS

With a view to supplying the demand for information on field crops from boys and girls, the University of Alberta has undertaken a survey and study of the wild or native grasses in the province. The information gathered from this study, which is being carried on under G. H. Culver, B.S.A., Professor of Field Husbandry, will be made available to the farm boys and girls of the province that can be reached with the information. The work is being undertaken by an officer of the Department through the cooperation of the boys and girls themselves. The officer in charge of the work will spend one month, or a part thereof, each year in systematic and scientific study of the fodder crop possibilities in the north and other parts of the province. Many native grasses have already been secured as a result of the preliminary studies that were carried out by utilizing the services of the members of boys' and girls' clubs. For the guidance of the boys and girls engaged in this work, Extension Circular, No. 3, Series 7, of the University of Alberta, has been prepared. This pamphlet explains the purposes of the study and instructs the students in writing down in detail particulars with respect to the various plants studied. The children are told to make collections to be brought to the boys' and girls' summer convention or to send them to the University by parcel post. The plants thus collected will be used in the courses of study. After the plants have been used for identifying purposes and study with respect to their possibilities, specimens are being filed as the beginning of a complete collection of Alberta grasses. The members of the classes will be asked to collect seed from such varieties as give promise of value. The seed will be used by the University for the production of plants for more exhaustive study and improvement of forage purposes.

Pertinent Tips on Winter Vacation Trips

If you are planning a Winter Vacation Trip and have not definitely determined where to go, consult nearest agent of the Canadian National-Grand Trunk Pacific Railways, or write to Mr. J. Madill, District Passenger Agent, Edmonton, Alta.
